

Technical Product Owner | Job Description

Ref: R00045

VoCoVo Company Overview

Every day, 50,000 people in 5,000 locations are doing business using VoCoVo technology. Our devices connect and deliver technology to deskless and remote workers.

VoCoVo is a leading voice & technology Challenger brand – many of Britain’s biggest household names rely on our voice communication technology to connect their workforces: Tesco, Co-Op, TK Maxx, Primark. We work with big names, but we operate a lean team. 50 of our 80 employees work in Research and Development, leading the way in developing voice-activated software for business.

We’re now ranked 5th in the Sunday Times Tech Track 100. We know we can better that.

Our year-on-year growth has been exponential, up 2,500% in the last 4 years. It’s still accelerating. We can better that too. In 2022 our ambition is to expand further into the European and North American marketplaces. We’re ambitious. We like a challenge.

Our Technical Product Owner will be the voice of our customers within the business and lead development of new features and products that solve our customer’s problems.

You will be an experienced professional looking to join a company which will enable you to achieve a personal best, as well as a company best. We will back those who challenge us and in return we take care of their personal welfare and wellbeing.

We offer challenge, autonomy, personal growth and reward.

We require commitment, high performance, integrity and personal responsibility.

We are seeking a Technical Product Owner who can match our game – and raise it.

Overview

We are looking to recruit a Technical Product Owner who will lead the development, implementation and ongoing improvement of products defined by the product strategy – taking concepts and piloted products through to full rollout with the support of a small cross-functional team.

Responsibilities

The successful candidate will steer software development efforts within Scrum teams from their technical perspective, to ensure successful delivery of products built upon scalable architecture. They should write and refine individual user stories using a Just-In-Time methodology to ensure appropriate levels of detail. Responsibilities include:

- Lead projects redeveloping systems particularly focused around remote automation
- Managing relationships with internal and external stakeholders
- Working closely with clients to understand their wants, needs and pain points
- Translate customer requirements into projects for the developer team
- Managing the developer team from tracking projects, scoping and outlining what success looks like

Requirements

- Demonstrable experience as a project manager or product owner
- Experience working with tech and software teams
- Experience managing projects related to software and hardware integration
- Ability to translate technical information and feedback between developer and client
- Experience working in an agile environment
- Clear communicator and a natural problem solver
- Customer focused and excellent organisational skills
- Prince 2 or other project management, agile or product qualifications desirable

If you are excited by this challenge then we want to hear from you.

To apply please forward your CV and covering letter, detailing why you feel this role is the perfect for you to hr@vocovo.com
