

Role | Delivery Manager & Scrum Master

Ref: R00130

Overview

As a Delivery Manager & Scrum Master, you will be responsible for ensuring that their development teams follow Agile principles and practices to deliver high quality products on time and within budget. You will work closely with the product owner, development team, and other stakeholders to manage the backlog of user stories, identify and address delivery issues, and continuously improve the Agile delivery process.

Responsibilities

- Act as a Scrum Master for the development teams, ensuring that Agile principles are followed, and Scrum ceremonies are conducted effectively
- Facilitate sprint planning, daily stand ups, sprint reviews, and retrospectives
- Manage the backlog of user stories and prioritization with the product owner
- Monitor team velocity and identify and address issues that may impact delivery
- Collaborate with the product owner and development team to ensure that the product backlog is refined and ready for the next sprint
- Deliver hardware, software and firmware based products
- Ensure that the team adheres to development best practices, standards, and procedures
- Communicate with stakeholders to ensure they are informed about project status and any risks or issues
- Collaborate with other teams and departments to ensure that dependencies are identified and managed
- Work with the internal teams to ensure that all project documentation is up to date and accurate
- Manage project budgets, schedules, and resources to ensure successful project delivery
- Continuously improve the Agile delivery process by experimenting and adapting to changes

Requirements

- Certified Scrum Master (CSM) or equivalent certification
- At least 5 years of experience as a Scrum Master or Delivery Manager in an Agile development environment
- Strong understanding of Agile principles, practices, and frameworks (e.g. Scrum, Kanban)
- Experience delivering hardware, software and firmware based products
- Excellent communication and interpersonal skills, with the ability to work effectively with cross functional teams
- Strong analytical and problem solving skills, with the ability to identify and address delivery issues in a timely manner
- Proven ability to manage project budgets, schedules, and resources to ensure successful project delivery
- Experience working in the retail industry is a plus

If you are passionate about Agile delivery and have experience managing complex software and hardware projects and excited by this challenge then we want to hear from you.

To apply please forward your CV and covering letter, detailing why you feel this role is the perfect for you to hr@vocovo.com
